WirelessGate to Commence Sales of LTE-Ready SIM Cards

Acceptance of Pre-Sale Reservations Commenced Today at Yodobashi Camera

WirelessGate, Inc. (Head Office: Shinagawa-ku, Tokyo; Representative Director and CEO: Yoichi Matsumoto; hereinafter "WirelessGate"), a wireless broadband platform provider, has announced that it is embarking on SIM-related services in the field of LTE communication and enriched solutions, which were under consideration for commercialization as explained in the announcement dated May 8, 2014, *Notice Regarding SIM-Related Services on LTE Communication and Enrichment of Solutions*.

WirelessGate will begin offering services with the WirelessGate Wi-Fi+LTE SIM Card that is ready for LTE communication. The card grants users access to WirelessGate Wi-Fi, which enables connection to nearly 40,000 wireless LAN spots, and to an LTE communication service that is set to cover NTT DOCOMO's Xi^(TM) areas. Four different service plans with different fee levels will be offered. The card will be released on September 1, and pre-sale reservations will be accepted from today at Yodobashi Camera stores nationwide and on the Yodobashi.com online shopping website.

WirelessGate Wi-Fi+LTE SIM Card Service Plan Descriptions

Monthly usage fee (including tax)	Communication available	Monthly LTE data traffic limit* ¹	LTE downstream speed* ²	Major sales channels
480 yen	WirelessGate Wi-Fi (equivalent to the existing service with unlimited access for the monthly usage fee of 390 yen) + LTE	Unlimited	Up to 250 kbps	- Yodobashi Camera stores - Yodobashi.com
920 yen		1 GB	Up to 150 Mbps	
2,480 yen		5 GB	Up to 150 Mbps	
5,490 yen		10 GB	Up to 150 Mbps	

*1: After the monthly LTE data traffic limit is exceeded, the LTE data communication speed will be a maximum of 250 kbps in both upstream and downstream directions, while WirelessGate Wi-Fi will remain accessible. After the monthly LTE data traffic limit is exceeded, it is possible to enjoy LTE communication at the maximum downstream speed of 150 Mbps by separately purchasing a plan for an additional 200 MB of traffic for 540 yen (including tax).

*2: The communication speed is on a best effort basis, and the maximum speed in the specifications is not guaranteed to be the effective speed.

The WirelessGate Wi-Fi+LTE SIM Card will offer a broad array of service plans, ranging from a plan entailing the industry's lowest subscription monthly usage fee of 480 yen to a plan that offers the industry's highest monthly data traffic of up to 10 GB. The lowest-priced plan costs 480 yen per month, although it provides a combination of WirelessGate Wi-Fi and the LTE connection. Given that the monthly usage fee of the existing WirelessGate Wi-Fi is 390 yen, the LTE portion is effectively available for 90 yen.

The breadth of the lineup opens the way for the use of services suited to many different smartphones and tablets, and for choosing a plan that is best suited to the situation of use.

To date, WirelessGate has offered wireless communication services by combining multiple wireless communication infrastructures including wireless LAN access services, WiMAX, WiMAX2+ and LTE-ready routers. This enlargement of the service lineup will provide users with an even wider choice and boost convenience. WirelessGate will continue to improve its services so that anyone can enjoy convenient wireless broadband connection at any time.

Future Outlook

The impact of this move on the WirelessGate Group's consolidated financial results for the fiscal year ending December 2014 is under examination. WirelessGate believes that it will achieve a future increase in corporate value. Should it become clear that it would have a material impact on the financial results, WirelessGate will make a prompt announcement in accordance with timely disclosure.
